Bosch Rexroth to Highlight Power and Performance of Hägglunds Drive Technology at MINExpo 2021

Newest models of Hägglunds direct drive hydraulic motors and other technology offerings for mining applications on display in booth 413 at MINExpo in Las Vegas, NV

Key products on display in the Bosch Rexroth booth include products and systems that are ideal for applications needing high torque and low speed. Bosch Rexroth will showcase multiple high-performance Hägglunds hydraulic motors and other Rexroth hydraulic products and services in booth 413 at MINExpo 2021, September 13-15, in Las Vegas, NV.

At the world's largest mining industry event, Bosch Rexroth will have exhibits and presentations that detail the advanced capabilities of the company's proven Hägglunds products, systems that are ideal for applications needing high torque and low or variable speed — from crushers and conveyors to mills and winches.

Rexroth will also present details on new drive applications and cutting-edge ways to put data and insights to work. System demonstrations and

presentations will focus on key advantages Rexroth and Hägglunds technology offers, such as:

Reliability in even more applications: With their rugged design and remarkable torque capabilities, Hägglunds hydraulic drive systems simply keep things moving.

Advancing productivity: Rexroth is pushing boundaries not only in the Hägglunds hydraulic motors, but also in Rexroth's already compact drive construction.

Connected partnership: Discover how connectivity is being integrated into Rexroth's hydraulic drive solutions, and how it helps mining equipment builders and mining operations benefit even more from Rexroth's Hägglunds service expertise.

In addition, Bosch Rexroth will also provide details on several Hägglunds offerings:

Hägglunds Atom hydraulic motor: For drilling, trenching, mobile equipment and other mining applications where both compact size and high power density are required. With a maximum torque of up to 13.6 kNm and a specific torque of 40 Nm/bar, the Hägglunds Atom hydraulic motor supplies full torque at speeds up to 400 rpm, enabling it to supply a maximum power of 394 kW that outstrips other motors in its class.

Hägglunds CB hydraulic direct drive motors: Tough and rugged with a wide range of sizes and displacements, the Hägglunds CB range is suitable for many heavy-duty applications, such as shredders, feeders and roll mills. It combines space-saving designs and versatile mounting options with a wide range of sizes and displacements to enable optimization of the drive system when selecting the motor and the hydraulic pump combinations.

Hägglunds CMp condition maintenance program: This new service provides peace of mind through a complete, condition-based maintenance program to maximize Hägglunds equipment uptime. A Hägglunds connectivity tool and Rexroth's ODiN analytics package monitor the health of existing installed Hägglunds systems. Then, based on predetermined service levels, Hägglunds factory-trained and certified service professionals will take

the steps specified in the CMp agreement to service the drive and assure its continuing performance.

Booth visitors can stop by to connect one-on-one with Rexroth and Hägglunds technology experts and discuss the unique challenges and requirements they have in their mining operations. These experts will be able to provide practical recommendations and new ideas about how Rexroth and Hägglunds technology can help mining operations maximize uptime and improve operational efficiency.

About Bosch Rexroth:

As one of the world's leading suppliers of drive and control technologies, Bosch Rexroth ensures efficient, powerful and safe movement in machines and systems of any size. The company bundles global application experience in the market segments of Mobile Applications, Machinery Applications and Engineering, and Factory Automation. With its intelligent components, customized system solutions and services, Bosch Rexroth is creating the necessary environment for fully connected applications. Bosch Rexroth offers its customers hydraulics, electric drive and control technology, gear technology and linear motion and assembly technology, including software and interfaces to the Internet of Things. With locations in over 80 countries, more than 29,600 associates generated sales revenue of around 5.2 billion euros ($6.3 billion) in 2020.

About Bosch:

Having established a regional presence in 1906 in North America, the Bosch Group employs 34,700 associates in more than 100 locations, as of December 31, 2020. According to preliminary figures, Bosch generated consolidated sales of $13.1 billion in the U.S., Canada and Mexico. For more information, visit www.bosch.us, www.bosch.ca and www.bosch.mx.

The Bosch Group is a leading global supplier of technology and services. It employs roughly 394,500 associates worldwide (as of December 31, 2020). According to preliminary figures, the company generated sales of $87.1 billion in 2020. Its operations are divided into four business sectors: Mobility Solutions, Industrial Technology, Consumer Goods, and Energy and Building Technology. As a leading IoT provider, Bosch offers innovative solutions for smart homes, Industry 4.0, and connected mobility. Bosch is pursuing a vision of mobility that is sustainable, safe, and exciting. It uses its expertise in sensor technology, software, and services, as well as its own IoT cloud, to offer its customers connected, cross-domain solutions from a single source.

The Bosch Group's strategic objective is to facilitate connected living with products and solutions that either contain artificial intelligence (AI) or have been developed or manufactured with its help. Bosch improves quality of life worldwide with products and services that are innovative and spark enthusiasm. In short, Bosch creates technology that is "Invented for life." The Bosch Group comprises Robert Bosch GmbH and its roughly 440 subsidiary and regional companies in 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. The basis for the company's future growth is its innovative strength. At 126 locations across the globe, Bosch employs some 73,000 associates in research and development, as well as roughly 30,000 software engineers.
