

## 1) Direct purchase of software licenses via Store

From now on, software licenses can be purchased directly through the Rexroth Store. This was not possible before. It is now possible to provide the licensee directly during checkout. This optimizes the ordering process and ensures that the License are correctly assigned.

## 2) Improved design of the product detail page

The screenshot displays the product detail page for a Rexroth valve. At the top, a navigation bar contains tabs for 'PRODUCT DESCRIPTION', 'TECHNICAL SPECS', 'CAD', 'DOWNLOADS', 'SPARE PARTS', and 'ACCESSORIES'. The 'PRODUCT DESCRIPTION' section is highlighted with a red dashed border. Below it, the 'Technical Specs' section is presented as a table with various parameters. The 'CAD' section shows a download button for a CAD file. The 'Downloads' section includes filters for media type and language, followed by a list of downloadable manuals. The 'Spare Parts' section lists various components like seal kits, solenoid coils, and nuts. The 'Accessories' section lists plug-in connectors. Each item in the 'Spare Parts' and 'Accessories' sections includes a quantity selector and an 'ADD TO CART' button.

Product attributes	
Connection diagram	ISO 4401-05-04-0-05
Product family	WE10.../E
Operating pressure, max. [bar]	300.0
Max. flow [l/min]	135.0
Spool symbol	Symbol C
Type of connection	Subplate mounting
Size	30
Type of actuation	with solenoid actuation
Number of ports	4
Number of switching positions	2
Supply voltage	24 VDC
Electrical connector	Connector, 3-pole (2 + PE)
Electrical connection description	Connector, 3-pole (2 + PE) according to EN 175301-803
Hydraulic fluid	MFC HS HLP HLFD HLPF HLFDP
Seals	NBR
Weight [kg]	4

The entire product detail page is now scrollable to seamlessly overview all product information. A "Sticky Tab Overview" remains visible at the top of the page while scrolling, for quick access to different sections.

If available, all available content and information about a product will always be displayed on the product detail page.

### 2.1) Enhanced CAD access on the product detail page

We now offer two different ways to display and download CAD data directly on the product detail page:

- **Direct download:** CAD files can now be downloaded directly. The source of these downloads is identical to that of the documents displayed in the 'Downloads' tab.

- **Link to the configurator:** For product variants, there is now a direct link to a configurator that offers the CAD download option for the configured variant.

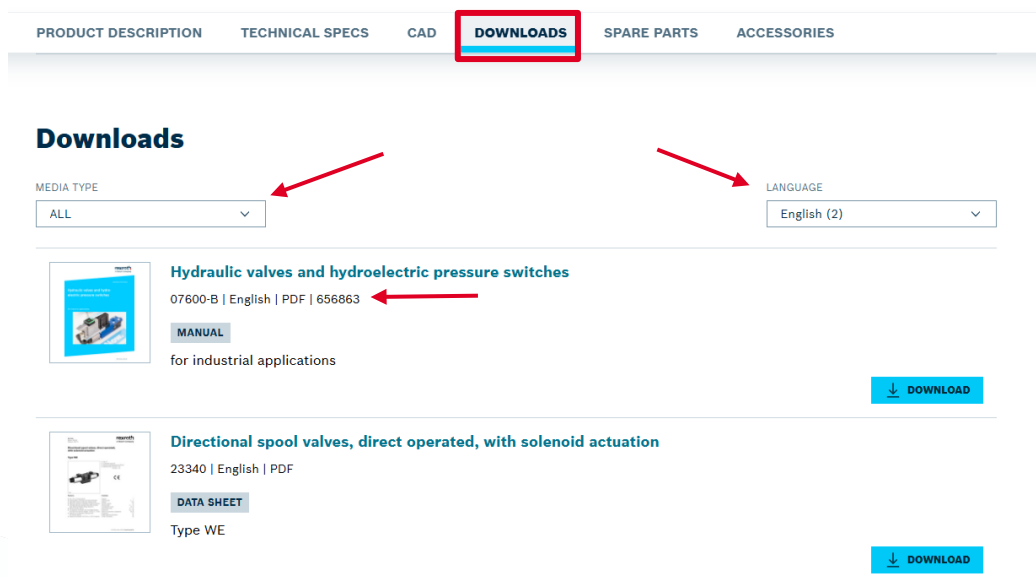

For this product we found configuration details including CAD data and further documents.

[OPEN CONFIGURATOR](#)

### 2.2) Improved download experience on product detail page

The tab for additional documents was previously called "Documents" and has now been renamed to "**Downloads**" to more accurately reflect its function.

In addition, filters are now available for some documents based on media type and language. From now on, you can see at a glance the media type indicators, the edition date, the language, the file type and size, as well as a preview image for each document.

## 2.3) Tab “Spare Parts” and “Accessories”

From now on, tabs for spare parts and accessories will only be displayed when corresponding information is available. Previously, spare parts were only accessible through the separate spare parts catalog.

Now, you have the option to add spare parts and accessories, if available, directly to the shopping cart from the product detail page, save them to the Wishlist, or configure them if necessary. However, for some spare parts there is still a link to the spare parts catalog for further action.
