What we do

Key focus areas.

Energy

We assist our clients in creating next-generation electric product platforms that are digitally advanced and user-centric, paving the way for a net-zero emissions future.

Cybersecurity

We provide comprehensive cybersecurity services to help clients protect their critical assets and systems. We pride ourselves on taking a holistic approach to security.

Sustainability

We help future-proof our clients' businesses by developing sustainable solutions in accordance with regulations and market demands. Optimized for circularity and resilience.

Our offering.

Product Cybersecurity

We help future-proof our clients' businesses by developing secure products and services in accordance with regulations and market demands. Optimized for security and resilience.

OT Cybersecurity

We help our customers to transition into Industry 4.0 and embrace digitalization by ensuring the security of their factories. We pride ourselves on taking a holistic approach to security.

Secure by Design

All software we develop, embedded, applications, mobile apps and cloud services all follow our best practices for developing secure software and our customers can rest assured that security has been built into everything we do.

What to expect from the presentation

Purpose

I want everyone to understand and realize how important your company's reputation is, and how Cybersecurity in particular is affecting that. This will set the stage for more discussions after the presentation.

Goals

After this presentation, you'll have a helpful guide for your future work on cybersecurity. It's also a starting point for how You and Knightec can work together to support you on this journey.

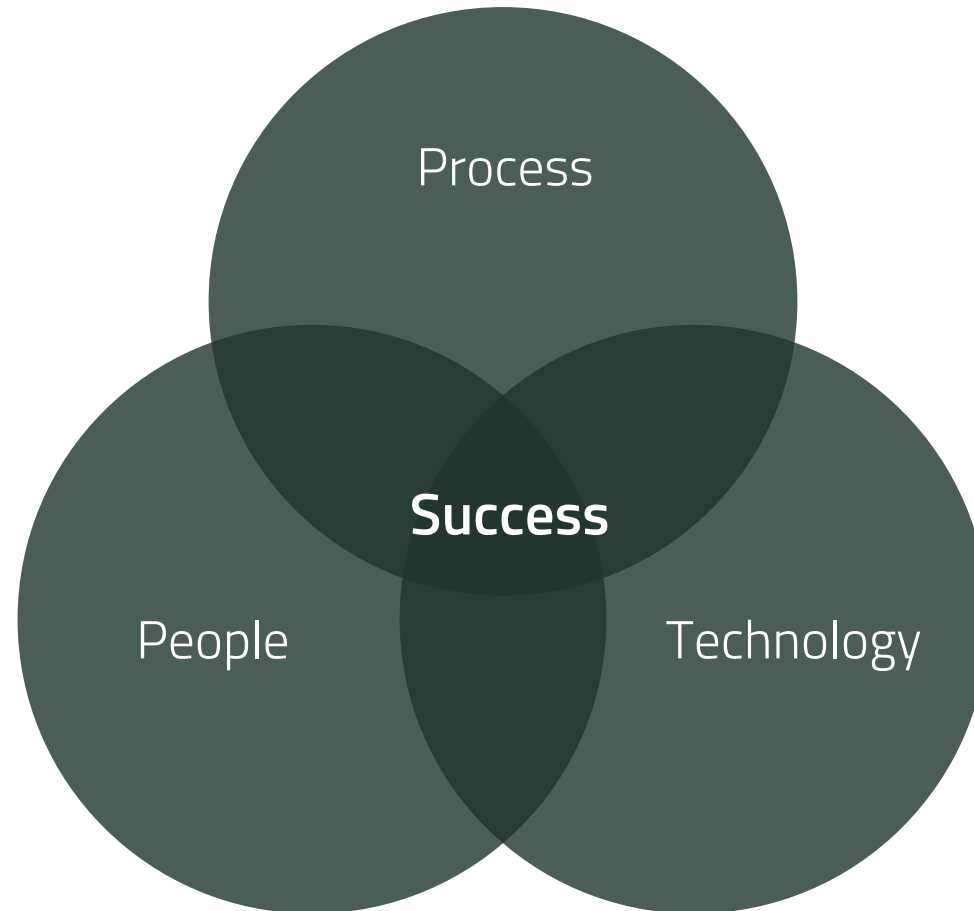

Security Awareness

Brand Value

The importance of branding
