# Bosch Rexroth Showcasing Simplified Solutions for Mobile Machines at CONEXPO 2026

Jennifer Fanning | 04/13/2026 | USA | DC26001

Booth S80245 visitors will experience a broad portfolio of innovative Bosch Rexroth components and a digital journey that demonstrates an approach to simplifying solutions with customers and partners.

**Discover how Bosch Rexroth is providing practical, performance-driven solutions for mobile applications, electronically controllable working hydraulics, scalable off-highway automation, first-class service and efficient electric drivetrains at CONEXPO 2026 March 3-7 in the South Hall, booth S80245 at the Las Vegas Convention Center.**

With an extensive portfolio of digital demos, product displays and mobile machine technology experts on site at CONEXPO, booth visitors will learn about the full range of advanced solutions and components Bosch Rexroth offers the construction, agriculture and off-highway equipment industries.

The booth will showcase how Bosch Rexroth technologies continue to transform mobile machines, offering proven capabilities and performance that deliver increased power, safety, efficiency and intelligence. Visitors will also observe how Bosch Rexroth technology platforms are tailored to seamlessly integrate and scale. This allows manufacturers of different sizes and in various development stages to engineer effective solutions with digital systems alongside groundbreaking drive and working functions.

**SIMPLIFIED ENGINEERING:** The Bosch Rexroth team has extensive experience and are trusted and dedicated partners. These experts are committed to simplifying solutions throughout the entire life cycle of their customers' machines. They collaborate with and support customers during the design phase of a new machine by providing performance testing and service on operational machines, plus serve as key advisors in identifying opportunities and developing solutions that evolve machine functions to maximize their capabilities.

**CONSTRUCTION SOLUTIONS:** Bosch Rexroth will showcase a broad range of construction solutions for a variety of heavy machines including excavators, loaders, and more, complete with hydraulic components, mobile automation capabilities, electronic controls and electric drives. Product experts will explain how these innovative solutions deliver enhanced performance, efficiency, safety and sustainability with lower emissions, as well as the signature Bosch quality and reliability that have set industry standards for decades.

**AUTOMATION SOLUTIONS:** Advanced and integrated assistance solutions will be featured, including modern sensors and intuitive operating devices to make heavy machines safer, more productive and eco-friendly. Bosch Rexroth specialists will discuss how these solutions can simplify machine operation with the integration of various levels of automation from discrete assistance functions to more complex systems.

**COMPACT SOLUTIONS:** Compact hydraulics from Bosch Rexroth include efficient and modular solutions for mobile machines through integrated high-performance components. With advanced control and connectivity for features like smart sensors and CAN communication, booth visitors will experience how compact solutions can deliver space and weight savings, enhanced control and simplified design through the HydraForce i-CHoos online tool.

**SERVICE SOLUTIONS:** Bosch Rexroth service solutions include OEM and aftermarket support, spare parts sourcing, remanufacturing, component replacement and traditional service for mobile hydraulics, electronics and electric drives. The on-site service team will explain how they support customers throughout the entire life cycle of their machines and help to deliver the highest possible total cost of ownership.

Throughout the show, Bosch Rexroth mobile machine and mobile hydraulics technology specialists will be available to discuss key details on each component, technology and solution being exhibited. They will also be available to discuss specific construction, agriculture and off-

## PRESS INFORMATION

highway equipment design, addressing engineering and applications challenges that impact mobile machine builders.

Bosch Rexroth experts can provide new insights and practical recommendations on how to simplify solutions by applying the latest hydraulic and digitally networked technologies to advance the performance, versatility and productivity of the next generation of mobile machines. ### Basic Information Bosch Rexroth

As one of the world's leading suppliers of drive and control technologies, Bosch Rexroth ensures efficient, powerful and safe movement in machines and systems of any size. The company bundles global application experience in the market segments of Mobile and Industrial Applications as well as Factory Automation. With its intelligent components, customized system solutions, engineering and services, Bosch Rexroth is creating the necessary environment for fully connected applications. Bosch Rexroth offers its customers hydraulics, electric drive and control technology, gear technology and linear motion and assembly technology, including software and interfaces to the Internet of Things. With locations in over 80 countries, around 32,600 associates generated sales revenue of 6.5 billion euros in 2024.

### Basic Information Bosch

The Bosch Group is a leading global supplier of technology and services. It employs roughly 412,000 associates worldwide (as of December 31, 2025). According to preliminary figures, the company generated sales of 91 billion euros in 2025. Its operations are divided into four business sectors: Mobility, Industrial Technology, Consumer Goods, and Energy and Building Technology. With its business activities, the company aims to use technology to help shape universal trends such as automation, electrification, digitalization, connectivity, and an orientation to sustainability. In this context, Bosch's broad diversification across regions and industries strengthens its innovativeness and robustness. Bosch uses its proven expertise in sensor technology, software, and services to offer customers cross-domain solutions from a single source. It also applies its expertise in connectivity and artificial intelligence in order to develop and manufacture user-friendly, sustainable products. With technology that is "Invented for life," Bosch wants to help improve quality of life and conserve natural resources. The Bosch Group comprises Robert Bosch GmbH and its roughly 490 subsidiary and regional companies in over 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. Bosch's innovative strength is key to the company's further development. At 136 locations across the globe, Bosch employs some 82,000 associates in research and development.
