

## PRESS INFORMATION

# Bosch Rexroth to showcase smarter, faster, and best-in-class automation solutions at Automate 2026

Jennifer Fanning | 04/22/2026 | USA | DC26002

Complete conveyance, extensive linear technology and market-leading control systems among the solutions on display at Booth #2810 in Chicago, June 22-25

**Bosch Rexroth will be exhibiting its diverse factory automation solutions at Booth #2810 at Automate 2026 in Chicago, as manufacturing continues to transition to a more automated environment via advanced, modern technology.**

Bosch Rexroth's portfolio provides a full range of solutions that encompasses high-end components, digital engineering tools, interactive exhibits and live demonstrations of working systems.

Among the demos are:

### **Comprehensive Conveyance**

Bosch Rexroth's TS conveyors will be on display at the booth, which are being leveraged across a variety of industry verticals and applications, including the new TS 7plus, the first conveyor capable of transporting payloads up to 3,000kg. Both the TS 2plus and TS 7plus are built on Bosch Rexroth's aluminum framing, which has been the industry standard for more than 40 years.

### **Complete Control**

Visitors to the Automate booth will also see Bosch Rexroth's complete ctrlX AUTOMATION offerings, including a cabinet-free display of ctrlX DRIVE, as well as the ctrlX CORE controller, and Bosch Rexroth's high-speed smart conveyance solution, ctrlX FLOW HS.

Additionally, Bosch Rexroth will showcase ctrlX OS and its ability to seamlessly integrate advanced technologies through an app-based ecosystem. By leveraging applications from Bosch Rexroth and industry partners, along with edge hardware capable of AI acceleration, the demo illustrates how ctrlX OS simplifies the integration of modern robotics and AI-driven vision systems.

### **Looking Linear**

Among the linear technology elements on display will be an interactive hologram showcasing Bosch Rexroth's complete catalog of linear motion components, including screws, bearings and linear modules. There will also be a Cartesian robot and a Smart Function Kit for Pressing demo, where visitors can see how components are leveraged within an automated pressing application. Finally, there will be a touch table at the center of the booth, which will feature this factory automation display where attendees can engage and further learn how Bosch Rexroth serves a variety of factory automation needs.

Bosch Rexroth's specialists will be on hand throughout the show to provide insights and guidance on crafting effective strategies for smarter and more efficient factory automation solutions with safety at the forefront. Booth visitors are also encouraged to visit Bosch Rexroth's subsidiary, Kassow Robots, at **booth #2036**.

## **Basic Information Bosch Rexroth**

As one of the world's leading suppliers of drive and control technologies, Bosch Rexroth ensures efficient, powerful and safe movement in machines and systems of any size. The company bundles global application experience in the market segments of Mobile and Industrial Applications as well as Factory Automation. With its intelligent components, customized system solutions, engineering and services, Bosch Rexroth is creating the necessary environment for fully connected applications. Bosch Rexroth offers its customers hydraulics, electric drive and control technology, gear technology and linear motion and assembly technology, including

## PRESS INFORMATION

software and interfaces to the Internet of Things. With locations in over 80 countries, around 32,600 associates generated sales revenue of 6.5 billion euros in 2024.

### Basic Information Bosch

The Bosch Group is a leading global supplier of technology and services. It employs roughly 412,000 associates worldwide (as of December 31, 2025). According to preliminary figures, the company generated sales of 91 billion euros in 2025. Its operations are divided into four business sectors: Mobility, Industrial Technology, Consumer Goods, and Energy and Building Technology. With its business activities, the company aims to use technology to help shape universal trends such as automation, electrification, digitalization, connectivity, and an orientation to sustainability. In this context, Bosch's broad diversification across regions and industries strengthens its innovativeness and robustness. Bosch uses its proven expertise in sensor technology, software, and services to offer customers cross-domain solutions from a single source. It also applies its expertise in connectivity and artificial intelligence in order to develop and manufacture user-friendly, sustainable products. With technology that is "Invented for life," Bosch wants to help improve quality of life and conserve natural resources. The Bosch Group comprises Robert Bosch GmbH and its roughly 490 subsidiary and regional companies in over 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. Bosch's innovative strength is key to the company's further development. At 136 locations across the globe, Bosch employs some 82,000 associates in research and development.
