Häggblunds Fusion takes home an NED Innovation award in the Hydraulics & Pneumatics category

Susan Strauss | 12/15/2022 | USA | HD22005

The NED Innovation award celebrates innovative products that empower manufacturers to work faster, better, and more cost-effectively.

Häggblunds Fusion won the Hydraulics & Pneumatics category of the New Equipment Digest (NED) Innovation awards. NED readers voted on winners from a comprehensive list of finalists and determined the most innovative option based on provided product information.

Häggblunds Fusion is a powerful drive system that mounts directly on the drive shaft – housing the motor, pump and controls in the torque arm, allowing for a smaller footprint. The design was based on prior evolutions of this product called TADS and SCD. Fusion takes the best elements from these designs and refined them to offer a more attractive packaged solution to the market.

Compact in design, Häggblunds Fusion places the entire hydraulic drive system on the torque arm — no additional gearbox, foundation or external equipment is needed. With all components in one place, it is easy to install and maintain. Our plug-and-play design provides maximum torque from zero speed along with built-in protection from torque peaks.

Häggblunds Fusion saves more than just space. The Fusion drive system lowers the total cost of ownership by creating a money-saving alternative to electromechanical drives in lower power ranges.

Best of all, the modular design allows for future flexibility. So you get a solution you can grow with, even when your demands are greater than your space.

PRESS INFORMATION

Basic Information Bosch Rexroth

As one of the world's leading suppliers of drive and control technologies, Bosch Rexroth ensures efficient, powerful and safe movement in machines and systems of any size. The company bundles global application experience in the market segments of Mobile Applications, Machinery Applications and Engineering, and Factory Automation. With its intelligent components, customized system solutions and services, Bosch Rexroth is creating the necessary environment for fully connected applications. Bosch Rexroth offers its customers hydraulics, electric drive and control technology, gear technology and linear motion and assembly technology, including software and interfaces to the Internet of Things. With locations in over 80 countries, more than 31,000 associates generated sales revenue of around 6.2 billion euros in 2019.

Basic Information Bosch

The Bosch Group is a leading global supplier of technology and services. It employs roughly 395,000 associates worldwide (as of December 31, 2020). The company generated sales of 71.5 billion euros in 2020. Its operations are divided into four business sectors: Mobility Solutions, Industrial Technology, Consumer Goods, and Energy and Building Technology. As a leading IoT provider, Bosch offers innovative solutions for smart homes, Industry 4.0, and connected mobility. Bosch is pursuing a vision of mobility that is sustainable, safe, and exciting. It uses its expertise in sensor technology, software, and services, as well as its own IoT cloud, to offer its customers connected, cross-domain solutions from a single source. The Bosch Group's strategic objective is to facilitate connected living with products and solutions that either contain artificial intelligence (AI) or have been developed or manufactured with its help. Bosch improves quality of life worldwide with products and services that are innovative and spark enthusiasm. In short, Bosch creates technology that is "Invented for life." The Bosch Group comprises Robert Bosch GmbH and its roughly 440 subsidiary and regional companies in some 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. With its more than 400 locations worldwide, the Bosch Group has been carbon neutral since the first quarter of 2020. The basis for the company's future growth is its innovative strength. At 129 locations across the globe, Bosch employs some 73,000 associates in research and development, of which nearly 34,000 are software engineers.
