Häggglunds Preventive Maintenance Program

HÄGGLUNDS 

Partners in performance

For decades, Hägglunds systems and solutions have delivered reliability in your application – and so have our service experts. Our service team is on your side 24/7, wherever you happen to be.

Whether assisting you on site, supporting you remotely, or making repairs and adjustments in our workshops, we keep your existing Hägglunds systems running strong. But we can also upgrade your existing drives, putting the latest advances and application know-how to work for your productivity.

Peace of mind with Hägglunds Preventive Maintenance Program

When it comes to drive system health, acting is better than reacting. Through our Preventive Maintenance (PM) Programs, Hägglunds specialists keep your costs down and your production up!

ADVANTAGES

- Minimize unplanned downtime
- Few interruptions to critical operations
- Longer asset life
- Improved efficiency
- Allows for planning ahead and budgeting for upcoming maintenance
- Safer work environment
- Compare original parameters and specifications to current running conditions
- Lower maintenance cost

The basic Hägglunds Preventive Maintenance Program consists of two (2) annual visits per year and includes a Minor and a Major PM service.

MINOR PM SERVICE

A Hägglunds specialist spends a day at your site visually inspecting Hägglunds equipment and addressing any current concerns. This may include making adjustments, changing filters and taking oil samples, plus digging deeper for other issues that should be addressed to prevent unplanned downtime.

MAJOR PM SERVICE

During a planned shutdown, one of our Hägglunds specialists will spend a day at your facility. Performing this maintenance during a shutdown allows pump adjustments, detailed component inspections, leakage repairs, drain flow analysis, motor and pump replacement, oil cooling analysis, and other services that ensure total reliability of your Hägglunds equipment.
