

Häggglunds

Original Service

HÄGGLUNDS

Partners in your performance

Your Hägglunds hydraulic drive system is a solution like no other. That's why our team brings you service like no other. Hägglunds service specialists are driven to maximize your uptime and productivity – driven to the core.

AVAILABILITY ON EVERY LEVEL

When your business depends on your machines, their reliability is everything. So turn to us to keep your Hägglunds drive systems going strong. At our workshops, at your site and online, we provide complete drive services that safeguard performance and lifetime. Always on your side, we're the only ones certified to service your Hägglunds solutions.

KNOW-HOW MAKES THE DIFFERENCE

No matter where or how you work with us, you can count on our knowledge. Hägglunds service specialists have many years of experience with Hägglunds solutions, as well as direct access to our factory for technical support. In addition, they have the latest information from Hägglunds R&D.

TOTAL PEACE OF MIND

By choosing our services and Hägglunds Original Spares, you get Hägglunds quality and precision – from the parts themselves to their installation by experts. You can be sure of proper function, cost efficiency and long lifetime, which is why we extend your warranty when we do the repairs.

WITH YOU THROUGHOUT NORTH AMERICA

Our team can be anywhere you need us. You'll find fully equipped Hägglunds Service and Repair Centers in Ohio and Texas (USA), Ontario and Alberta (Canada). And we're always in easy reach at www.boschrexroth-us.com/hagglunds

Rely on our expertise

Upgrades from Hägglunds Marathon

Expand your drive's capabilities and shrink its footprint by taking advantage of the latest Hägglunds motor developments. Upgrade smaller Marathon motors to today's Hägglunds CB, or larger ones to the Hägglunds CBm, which packs 50% more torque into half the size and weight.

Hydraulic drive unit upgrades

Bring your worn or obsolete Hägglunds drive units up to today's standard. We can exchange them for newer space-saving units, or upgrade your existing units to take advantage of modern condition monitoring.

Motor and pump repairs

Regain productivity by having Hägglunds motors and pumps rebuilt to original specifications. We use only

Hägglunds Original Spare parts, and we offer quick turn-around for both Hägglunds Denison and Hägglunds SP pumps. All our repairs come with a full one-year warranty.

Fitness Checks

Identify drive system issues before they cause major failures, by having one of our Hägglunds service technicians visit your site. After a visual assessment of your equipment's condition, you'll get a Machine Health Report that details pressure, temperature and any problems to be addressed.

Preventative Maintenance (PM)

Get full peace of mind by letting a Hägglunds service technician review all drive system parameters and handle the repair needs identified by a Fitness Check. Together you'll discuss improvements and optimizations that can enhance and increase machine output. For continuous uptime and ongoing gains, we can even design a dedicated PM Program.

Condition monitoring

Put your drive system's health in the best of hands by connecting it directly with our service expertise. With the help of data-gathering sensors, Hägglunds CM provides remote overview and tools to improve utilization and maintenance planning. Hägglunds CMp goes even further, by analyzing your drive's system behavior. That lets our experts see trends and predict drive performance, so that you can plan service actions and take steps to protect your uptime.

Hägglunds training

Bring our knowledge into your business with training from Hägglunds professionals. We can customize a training program for your installed equipment, covering everything from basic hydraulic skills to component adjustments and troubleshooting.
