Reliable and intuitive: OPEXplus digital torque wrench from Bosch Rexroth

PI 050-22
For Immediate Use

Bosch Rexroth adds the OPEXplus digital torque wrench to its tightening tool portfolio

With the OPEXplus digital torque wrench, Bosch Rexroth has added a particularly economical new product to its existing range of tightening solutions. With the new solution, both the torque and the angle of rotation can be measured. It covers a range of torques from 3 to 800 Nm and transfers the tightening results to any IT systems with no need for additional control. The torque tools set new standards when it comes to accuracy and allow fatigue-free work thanks to their ergonomic design.

OPEXplus torque tools are recognized in networks via the embedded WiFi module. When a tool in an assembly line is changed, the module can simply be plugged into the new screwdriver. The supplied software allows parameterization via a hotspot, the customer network or a serial interface.

The intelligent OPEXplus transmits the tightening results with a tightening curve, as well as maximum torque and angle of rotation directly to any of the user's IT systems without additional control. To make this possible, OPEXplus supports popular protocols such as OpenProtocol, IPM or XML. A standard 21700 lithium-ion rechargeable cell which is available throughout the world supplies the power. Thanks to an optical aiming device, the camera-based scanner of the ergonomically optimized torque and angle-controlled wrench allows

For Immediate Use

An LED display ring on the handle is visible from all directions and shows the tightening process and the tightening result. A vibration module providing touch confirmation is optionally available. The color display allows the torque and angle-controlled wrench to be operated intuitively. The tool housing is made of a robust titanium-aluminum alloy with an anti-slip handle cover.

About Bosch Rexroth:

As one of the world's leading suppliers of drive and control technologies, Bosch Rexroth ensures efficient, powerful and safe movement in machines and systems of any size. The company bundles global application experience in the market segments of Mobile Applications, Machinery Applications and Engineering, and Factory Automation. With its intelligent components, customized system solutions and services, Bosch Rexroth is creating the necessary environment for fully connected applications. Bosch Rexroth offers its customers hydraulics, electric drive and control technology, gear technology and linear motion and assembly technology, including software and interfaces to the Internet of Things. With locations in over 80 countries, more than 31,000 associates generated sales revenue of around 6.2 billion euros in 2021.

The Bosch Group is a leading global supplier of technology and services. It employs roughly 420,000 associates worldwide (as of December 31, 2022). According to preliminary figures, the company generated sales of 88.4 billion euros in 2022. Its operations are divided into four business sectors: Mobility Solutions, Industrial Technology, Consumer Goods, and Energy and Building Technology. As a leading IoT provider, Bosch offers innovative solutions for smart homes, Industry 4.0, and connected mobility. Bosch is pursuing a vision of mobility that is sustainable, safe, and exciting. It uses its expertise in sensor technology, software, and services, as well as its own IoT cloud, to offer its customers connected, cross-domain solutions from a single source. The Bosch Group's strategic objective is to facilitate connected living with products and solutions that either contain artificial intelligence (AI) or have been developed or manufactured with its help. Bosch improves quality of life worldwide with products and services that are innovative and spark enthusiasm. In short, Bosch creates technology that is "Invented for life." The Bosch Group comprises Robert Bosch GmbH and its roughly 440 subsidiary and regional companies in some 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. With its more than 400 locations worldwide, the Bosch Group
