Partners in your performance

Your Häggglunds hydraulic drive system is a solution like no other. That's why our team brings you service like no other. Häggglunds service specialists are driven to maximize your uptime and productivity – driven to the core.

AVAILABILITY ON EVERY LEVEL

When your business depends on movement, drive reliability makes all the difference. So turn to us to keep Häggglunds drive systems going strong. At our workshops, at your site and even online, we provide complete drive services that safeguard performance and lifetime. We're the only ones certified to service your Häggglunds solutions, and our team is always ready.

KNOW-HOW MAKES THE DIFFERENCE

You can count on the knowledge of our service specialists, who have many years of experience with Häggglunds solutions. Besides direct access to technical support from our factory, they have the latest information from Häggglunds R&D. They can find the best and most cost-effective resolution to your

issues – or identify new ways to optimize your drive system and boost its productivity.

TOTAL PEACE OF MIND

By choosing our services and Häggglunds Original Spare Parts, you get Häggglunds quality and precision – from the parts themselves to their installation by experts with the same specialty tools we use at our plant. You can be sure of proper function, cost efficiency and long lifetime, which is why a warranty accompanies our repairs.

BY YOUR SIDE WORLDWIDE

Our team is prepared and close by. You'll find our service offices and fully equipped Häggglunds workshops throughout the world, and we're always in easy reach at www.hagglunds.com. ●

A FEW WAYS YOU CAN BENEFIT FROM THE OPTIONS IN OUR HÄGGLUNDS SERVICE PORTFOLIO:

Extended service

Get the most and best from your Häggglunds drive systems. Our knowledge can help prevent issues and optimize performance, and connectivity lets you take continuous advantage of it.

HÄGGLUNDS TRAINING. Bring our knowledge into your business with classroom or field training from Häggglunds professionals. We can customize a training program for your equipment, ranging from basic hydraulic skills to maintenance.

DRIVE CONNECTIVITY. Connect with our service expertise to put drive integrity in the best of hands. With data-gathering sensors, Häggglunds CM provides remote overview and tools to improve usage and maintenance. Häggglunds CMp goes further by identifying deviations in drive behavior, which lets our experts make predictive analyses and plan actions that safeguard performance and uptime.

Repairs

Regain productivity by having Häggglunds equipment rebuilt to its original specifications. Our Häggglunds repair specialists have up-to-date product knowledge, in-depth training and direct support from the factory, as well as access to the latest R&D insights.

HÄGGLUNDS SERVICE WORKSHOPS.

Our specialized workshops have all the lifting and testing equipment needed for quality repairs. The experts there use Häggglunds Original Spare Parts and the same procedures used at our plant, validating each repair to ensure flawless results.

EXTENDED WARRANTY. When you turn to certified Häggglunds experts, you can be sure of Häggglunds quality and performance. That's why we offer an extended warranty with most of our repairs.

Spare parts

Trust Häggglunds Original Spare Parts to get the performance and lifetime you demand from your drive solution. Manufactured with the correct materials, design and tolerances, our spare parts are tested and proven to deliver Häggglunds quality.

SINGLE SPARES OR COMPLETE SPARE UNITS.

You have easy access to spare parts for your Häggglunds drive units, including the pumps and control systems. Complete Häggglunds motors and drive units can be provided as spares, and replacement motors can be delivered straight from our factory in an emergency.

FORM-FIT FUNCTION. Modular Häggglunds systems are designed for a lifetime of flexibility. Because our spare parts have form-fit function, you can always replace an older part with a new Häggglunds spare. That lets you benefit from new part advances.

Field service

Rely on Häggglunds service experts to troubleshoot issues by phone or online. But they can do even more in the field. During single or regular visits to your site, they can evaluate drive integrity, install and commission new systems or help you get more from existing drives.

FITNESS CHECK. Find issues before they become problems by having a Häggglunds service technician assess your equipment's condition. Our expert will examine your drive, providing you with an inspection report and installation-specific recommendations.

UPGRADES AND MODERNIZATION. Achieve new levels of performance with the latest drive technology. Upgrading from Marathon motors, for example, gives you significantly more torque with just half the size and weight. Our specialists can also modernize your existing motors and systems.
