

# Häggglunds Inside Intelligence

Your smart link between drive and performance

HÄGGLUNDS 

**You and your drive system can both do more with Hägglunds expertise. By selecting a Hägglunds drive solution, you've already chosen wisely. And with Hägglunds Inside Intelligence, your choice becomes that much smarter.**

Properly managed connected systems can offer significant value to companies' business such as improved decision-making, quicker support and possibility to maximize the uptime of your Hägglunds drive system. Hägglunds Inside Intelligence is a modern suite of products and services that connect you and your drive with Hägglunds expertise. Through smart technology within your drive system and interactive solutions, it puts our half-century of experience right in your hands. What matters isn't the technology, but the productivity and peace of mind you achieve. Through instant analysis, real-time advice and condition monitoring, as well as predictive maintenance and other forms of proactive support, we help you increase your drive utilization and lower your cost of ownership. Hägglunds CM and Hägglunds CMp are part of Hägglunds Inside Intelligence, a suite of condition-based tools and services designed to unlock your drive system's full potential. This growing portfolio combines the advantages of Hägglunds original service with smart technologies and interactive solutions.

#### **HÄGGLUNDS**

#### **Bosch Rexroth Corporation**

3940 Gantz Road, Suite F

Grove City, OH 43123

tel: (614) 305-4999

Hägglunds is a brand of Rexroth.

R999001376/05.2022

#### **HÄGGLUNDS CM**

Hägglunds CM provides entry-level monitoring and logging. It gives you the possibility to remotely access key performance data that can improve your drive utilization and maintenance planning. With the help of the condition monitoring solution, both the end user and the local Bosch Rexroth expertise get the same view into the data.

#### **HÄGGLUNDS CMP**

Hägglunds CMP show you the true health of your Hägglunds drive system and connected hydraulics. By establishing a link between your drive system and Hägglunds expertise, it enables a machine system behavior, including historical data, trending and deeper analytics. The latter's secure and encrypted data communication lets us – or your own skilled engineers – look within your drive to optimize performance and initiate predictive condition-based maintenance to avoid the cost of downtime and reduce your total cost of ownership.

The data specified above only serve to describe the product. As our products are constantly being further developed, no statements concerning a certain condition or suitability for a certain application can be derived from our information. The information given does not release the user from the obligation of own judgment and verification. It must be remembered that our products are subject to a natural process of wear and aging.
